PROFILE

Project management leader with **15+ years of end to end delivery across very different industries and project scales**: banking, pensions and insurance, healthcare, utilities, government, e-commerce and startups. Deep on **risk assessment and mitigation, budget and resource management, adaptive planning** and leading cross functional teams. What makes my perspective unusual for AI training: I also **build and evaluate LLM and AI agent systems** in production, so I know what a data rich example looks like and how to critique a model's output. Exceptional at **breaking down complex concepts**, as a graduate level professor and client facing lead. Systems Engineer with an MBA.
